

1. Go to the **AWS website**: Navigate to the AWS website at <https://aws.amazon.com/>.
2. Click on "**Create an AWS Account**": Look for the "Create an AWS Account" button on the top right corner of the page and click on it.
3. **Provide your email address**: Enter your email address and choose "I am a new user" option.
4. **Enter your details**: Fill out the required information, including your name, email address, password, and an AWS account name.
5. **Contact Information**: Enter your contact information, including your address and phone number.
6. **Payment Information**: Enter your payment information. AWS requires a valid credit card to verify your identity, even if you plan to use free tier services.
7. **Choose a Support Plan**: Select a support plan based on your needs. You can choose between Basic (free) and Developer, Business, or Enterprise support plans which come with additional features and costs.
8. **Identity Verification**: AWS may require additional identity verification steps, such as phone verification.
9. **Accept AWS Agreement**: Read through the AWS Customer Agreement and click on the checkbox to confirm that you have read and agree to the terms.
10. **Complete Sign-up**: Click on the "Create Account and Continue" button.
11. **Confirmation Email**: AWS will send you a confirmation email. Click on the link provided in the email to verify your email address.
12. Your Account will be activated in 24Hrs.
13. **Login to your AWS account**: Once your email is verified, you can log in to your AWS account using your email address and password.
